

Advance your product with peace of mind.  
Your project is complex, your CDMO relationship shouldn't be.

## Analytical | Development | Clinical Trial Supply | Manufacturing

Experic was founded with a vision to reimagine pharmaceutical services. By combining top talent, innovative equipment, and robust processes with a proactive, quality-focused approach, we remain dedicated to this transformative vision today. From bench to GMP manufacturing, packaging, and patients, our team of seasoned experts and project managers seamlessly blend cutting-edge capabilities with customized solutions to meet your requirements.

Wherever your product is on the development journey, trust Experic to deliver solutions that conquer your toughest development challenges, mitigate risk, and accelerate time to market. **Partner with us for an improved customer experience!**

Experience and Expertise	Best-in-Class Facilities and Infrastructure	What We Deliver
<ul style="list-style-type: none"> <li>• Experienced professionals who have delivered projects from bench to commercial scale across a range of finished dose modalities</li> <li>• Global delivery of investigational medicinal products for clinical trials</li> <li>• Dry powder inhalation (DPI) expertise</li> </ul>	<ul style="list-style-type: none"> <li>• 9 Class 100,000 processing rooms</li> <li>• 3 secondary packaging rooms</li> <li>• Analytical laboratory</li> <li>• 16+ equipment technologies,</li> <li>• Secure and validated storage in the US and EU</li> <li>• Expansion space for bespoke solutions</li> </ul>	<ul style="list-style-type: none"> <li>• Effective solutions to achieve your phase-specific goals</li> <li>• Expert project management</li> <li>• Timely and collaborative communications</li> <li>• Adoption and implementation of best practices</li> <li>• Expert scientific insights supported by data</li> </ul>

## Experience the Experic Difference

Experic is a contract development and manufacturing organization (CDMO) and clinical trial supply services company specializing in development and manufacturing services for biopharmaceutical and pharmaceutical companies. Known for its cutting-edge capabilities and customer-centric approach, Experic offers a comprehensive suite of services designed to accelerate the development and commercialization of innovative therapies across a range of packaging and finished dose modalities, including dry powder inhalation (DPI) products. Leveraging our state-of-the-art cGMP facility, we manage global delivery of the highest quality products and services, even for expedited projects, while providing unparalleled knowledge, expertise, and customer service.
