

EXPERIC

The Experic Difference
Experience It

Exceptional Manufacturing and
Pharmaceutical Supply Chain Services

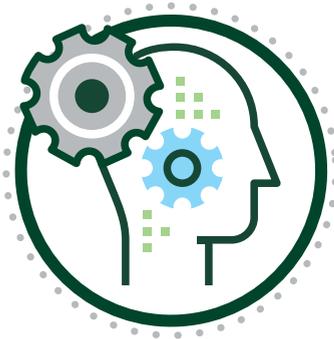

Experience Tailored Solutions and Client-Focused Care

Any delay in your drug development program or drug product delivery can impact time to market and return on investment. At Experic, we ensure you receive the exceptional, timely service you deserve. From clinical development to market, our goal is to make outsourcing pharmaceutical process development, manufacturing, packaging and logistics efficient and worry-free.

From the time you enter our state-of-the-art Class A manufacturing and packaging facility, you will see it was constructed with extensive capabilities, flexibility and compliance – and to welcome and engage our clients. From on-site customer offices, to a viewing corridor where you can observe your product being manufactured and packaged, our facility enables you to maintain productivity while on site.

Experience Industry-Leading Expertise and Proactive Project Management

Each project is assigned a project manager and leading scientific, manufacturing and supply chain professionals to form your project team. The project manager efficiently tracks and communicates project activity and milestones as well as facilitates timely access to our experts when consultation or collaboration is needed. Our in-house team — which has decades of experience — provides cost-effective and customized solutions to meet your requirements and timelines. Our robust and compliant quality management system meets industry standards and applicable regulatory requirements.

One of our areas of specialization is handling low dose powder filling. We can also package, store and distribute materials that require controlled room, refrigerated or frozen temperature environments, as well as Schedule II-V DEA controlled substances. With continuous, 24/7 environmental monitoring and security, product integrity is assured.

At Experic, you can maximize your productivity, get expert and timely support and rest easy that Experic has the expertise, tools and controls in place to make your project a success.

Get the Experic difference delivered in every product. **Experience It.**

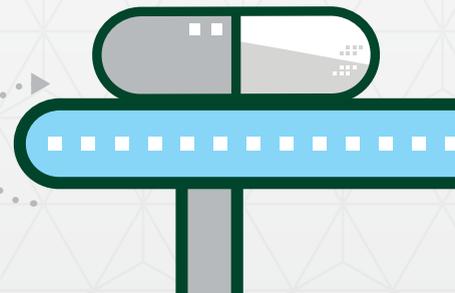

Experience Optimized Clinical Manufacturing and Logistics

We understand that planning a clinical trial is very complex. Once you are ready to start your study, your pharmaceutical supplies need to be ready as you randomize patients.

Our team will evaluate the properties of your product to optimize processing. Experic can manufacture a variety of dosage formats for investigational drug products, from capsules to low dose dry powder. Primary and secondary packaging options are available.

Clinical-Scale Manufacturing

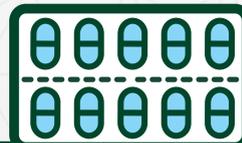

- Clinical-scale powder blending; low and high shear
- Capsule filling with integrated 100% verification
 - Powder
 - Tablets and micro-tablets
 - Pellets
 - Pouching
 - Capsule-in-capsule
 - Combination filling
- High speed, flexible tablet and capsule weighing
- Low dose powder filling/ dry powder inhalation
 - < 0.5 mg
 - Micronized and spray dried formulations
- Powder and pellet filling into various receptacles
 - Vials
 - Pouches
 - Discs
 - Cartridges
- Automated device assembly and labelling
- Auto-injectors
- Pens
 - Unique drug delivery devices

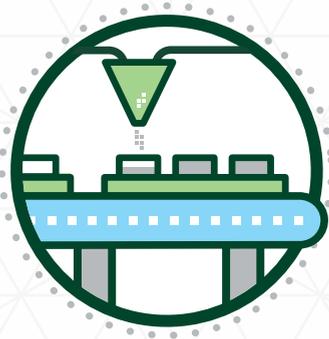

Meet your first-patient-in targets with a hands-on, quality-first approach and a state-of-the-art facility to expedite your investigational drug product.

Clinical-Scale Packaging and Logistics

- Primary packaging
 - Blisters (cold and thermo-formed)
 - Bottles
 - Pouches
 - Innovative medical devices
- Secondary packaging
 - Blister card sealing
 - Labeling
 - Kit assembly
 - Medical device packaging
- Label design, inspection, translation and printing management
- Access to interactive response technology (IRT)
- Distribution
 - Direct-to-sites
 - Direct-to-patient and global distribution through third-party network
- Commercial drug sourcing to support clinical trials
- Storage and warehouse
 - Controlled room temperature (15-25°C)
 - Humidity monitored
 - DEA controlled substance vault (CII – V)
 - Walk-in refrigerated storage (2-8°C)
 - Frozen material storage (-20°C & -80°C)
- Returns, reconciliation and destruction

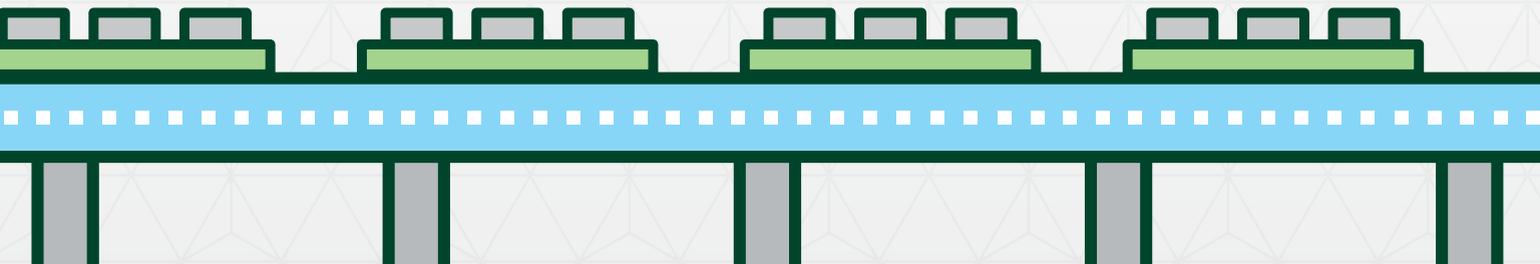

Experience Commercial Services with Customized End-to-End Solutions

Experic provides turnkey solutions for products that require commercial-scale production and custom equipment design and configuration. Our facility and Harro Höfliger filling equipment allow for complete process scalability. Custom filling equipment can be configured to accommodate your innovative or new delivery formats.

For commercial production of your products, Experic can provide build-to-suit suites in our 40,000 square-foot expansion space. We can also offer access to priority design, engineering and architectural services; expedited long-lead-time items (such as HVAC and mechanicals); commissioning support; and flexibility over control and monitoring systems — all in an end-to-end expansion program of approximately three to six months. (If specialized equipment needs to be manufactured, additional time will be required.)

Technical Transfer and Process Performance Qualification (PPQ)

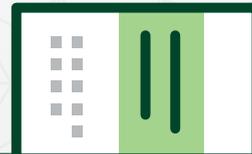

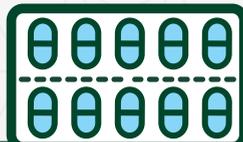

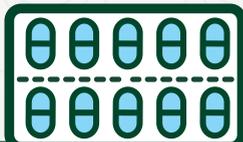

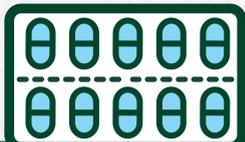

Commercial-Scale Manufacturing

Offered in a variety of formats including, but not limited to:

- Capsule filling with integrated 100% verification
 - Powder
 - Tablets and micro-tablets
 - Pellets
 - Pouching
 - Capsule-in-capsule
 - Combination filling
- High speed tablet and capsule weighing
- Low dose powder filling/dry powder inhalation
 - < 0.5 mg
 - Micronized and spray dried formulations
- Powder and pellet filling into various receptacles
 - Vials
 - Pouches
 - Disks
 - Cartridges
- Automated device assembly and labelling
 - Auto-injectors
 - Pens
 - Unique drug delivery devices
- Custom filling equipment configurations and packaging capabilities
- Build-to-suit suites

Commercial-Scale Packaging and Logistics

- Primary Packaging
 - Blisters (cold and thermo-formed)
 - Bottles
 - Pouches
 - Innovative medical devices
- Secondary Packaging
 - Kit assembly and labeling
 - Blister card sealing
 - Medical device packaging
 - Serialization and aggregation
- Storage & Warehouse
 - Controlled room temperature (15-25°C)
 - Humidity monitored
 - DEA controlled substance vault (CII – V)
 - Walk-in refrigerated storage (2-8°C)

Experience Comprehensive and Integrated Packaging and Logistics

Our team will proactively develop optimal packaging and logistics strategies for your program or product, including primary and secondary packaging, comprehensive labeling and advanced serialization services.

Primary Packaging

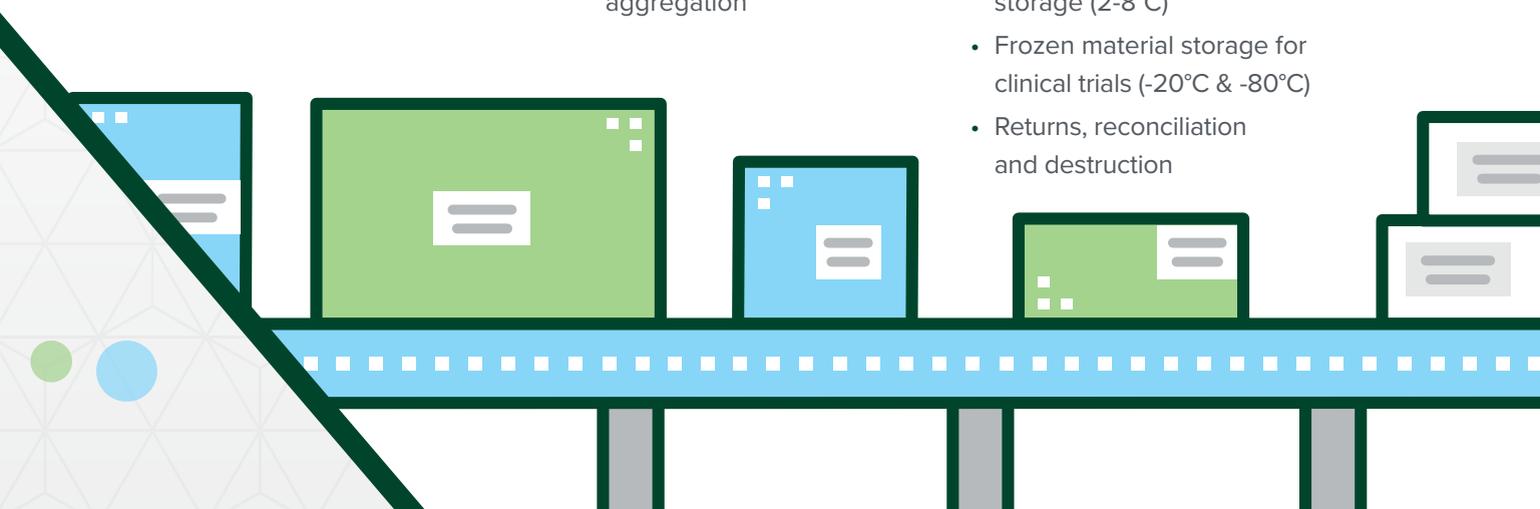

- Blisters (cold and thermo-formed)
- Bottles
- Pouches
- Innovative medical devices

Secondary Packaging

- Kit assembly and labeling
- Blister card sealing
- Medical device packaging
- Serialization and aggregation

Storage & Warehouse

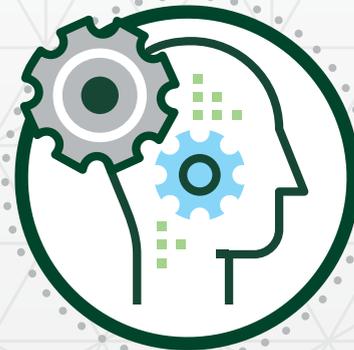

- Controlled room temperature (15-25°C)
- Humidity monitored
- DEA controlled substance vault (CII – V)
- Walk-in refrigerated storage (2-8°C)
- Frozen material storage for clinical trials (-20°C & -80°C)
- Returns, reconciliation and destruction

The Experic Difference Experience It

Experic was founded with a vision to reimagine pharmaceutical supply services. By combining the best talent, equipment and processes with a proactive, quality-focused approach, we deliver the kind of experience you deserve.

As a contract manufacturing organization serving the pharmaceutical industry, we enjoy a unique partnership with Harro Höfliger. Their premier filling equipment allows for complete scalability as client products progress from clinical development to commercial production. This feature mitigates the risk of scale-up at Experic, while affording our clients expedited access to standard and custom configurations and approaches for the most challenging drug formats.

**It's time to work with the partner that puts your project
— and you — first. That's the Experic difference.**
